Ventilate area of leak or spill. Wear appropriate personal protective equipment as specified in section 8. Sweep up and containerize for reclamation or disposal.

## 7.0 HANDLING AND STORAGE

Keep in tightly closed container, stored in a cool, dry, ventilated area. Protect against physical damage. Isolate from incompatible substances. Containers of this material may be hazardous when empty since they retain product residues (dust, solids); Observe all warnings and precautions listed for the product.

## 8.0 EXPOSURE CONTROLS/ PERSONAL PROTECTION

Airborne Exposure Limits	: None established
Ventilation System	: A system of local and/or general exhaust is recommended to keep the employee exposures as low as possible. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Please refer to the ACGIH document, Industrial Ventilation, A manual of Recommended Practices, most recent edition, for details.
Personal Respirators (NIOSH approved)	: For conditions of use where exposure to the dust or mist is apparent, a half-face dust/mist respirator may be worn. For emergencies or instances where the exposure levels are not known, use a full-face positive, air-supplied respirator.
Warning	: Air purifying respirators do not protect workers in oxygen-deficient atmospheres.
Skin Protection	: Wear impervious protective clothing, including boots, gloves, lab coat, apron or coveralls, as appropriate, to prevent skin contact.
Eye Protection	: Use chemical safety goggles and or full face shield where splashing of solution is possible. Maintain eye wash fountain and quick-drench facilities in work area.
